

A list of resources:

Have questions about energy conservation at CSU?
Contact Stacey Baumgarn, Campus Energy Coordinator,
Stacey.Baumgarn@colostate.edu, 491-0328

For more information about energy, water and resource conservation
Please visit the **CSU Sustainability in Facilities Management** site:

www.fm.colostate.edu/sustain

and

www.green.colostate.edu

Additional resources and energy conservation checklists:

- [CSU Extension](#) has fact sheets, decision tools, etc. and can provide individualized assistance to folks looking to reduce their energy use at home
 - CSU Extension: www.ext.colostate.edu/energy
- [Better Buildings Colorado](#) has information regarding energy saving tips and more
 - Better Buildings Colorado: <https://www.colorado.gov/betterbuildingsco>
- There is a wealth of information available from [ENERGY STAR](#), you will find ways to save energy (and money) at home and at work
 - ENERGY STAR: www.energystar.gov
- 100 Views of Climate Change (Changing Climates @ Colorado State University). This site offers **433 annotated entries** (videos, books, articles & essays, websites, and a few teaching materials). Virtually all the materials will make sense to adult, non-specialist readers (college-age students, interested citizens, and those who specialize in part but not all of this topic); most include notes or links to primary (technical) sources; most are well-written, lively, and engaging
 - Changing Climates: <http://sustainability.colostate.edu/centers/changing-climates>

Want to measure electricity consumption of items around your office or at home?

You can check-out a "Kill-a-Watt EZ" from:

- CSU Morgan Library: just search Primo for "Kill-a-Watt EZ" – four devices are loanable!
- Poudre River Library District (any branch) (ask/search for the "Energy Meter Kit")
- Fort Collins Utilities' Customer Service Center
222 Laporte St., Fort Collins, CO 80521

Conservation Matters at CSU
